Cognitive Psychology By Douglas Medin, Brian H. Ross, Arthur B. Markman

This coherent overview of cognitive psychology is organized in terms of themes that cut across topic areas. Written by well-known researchers, the book is completely current in describing ongoing controversies in research; it provides summaries of key experiments that distinguish between them; and it encourages the reader to think critically about current research and theories. The focus on the importance of physical and computational constraints on cognition is preserved throughout the book.

Editorial Review

About the Author

Douglas Medin (Ph.D., University of South Dakota) taught at the Rockefeller University, University of Illinois, and the University of Michigan before assuming his current position as CAS Visiting Committee Research and Teaching Professor at Northwestern University. Best known for his research on concepts and categorization, his recent research interests have extended to decision making, cross-cultural studies of reasoning and categorization, and cognitive dimensions of resource use. He teaches courses in cognitive psychology, psychology of thinking and reasoning, decision making, and culture and cognition. He is the editor of the journal *Cognitive Psychology* and is a past editor of the Academic Press series, *Psychology of Learning and Motivation*.

Brian Ross received his Sc.B. in Psychology from Brown University and his M.A. from Yale University before receiving his Ph.D. from Stanford University. He teaches at the University of Illinois, where he is Professor of Psychology and also in the Beckman Institute. He teaches courses in cognitive psychology, the psychology of thinking, introductory statistics, problem solving, and mathematical models of memory. His research has examined issues in categorization, problem solving, learning and memory. He is series editor for *The psychology of learning and motivation*, as well as associate editor of the journal *Psychonomic Bulletin & Review*.

Arthur Markman received his M.A. and Ph.D. in Psychology from the University of Illinois after completing his Sc.B. in Cognitive Science at Brown University. He worked at Northwestern University and Columbia University before moving to the University of Texas at Austin, where he is now Professor of Psychology and Marketing. He teaches courses in cognitive psychology, research methods and statistics, reasoning, and decision making and knowledge representation, and he supervises the honors program. His research has explored similarity, categorization, and decision making. He served as Executive Officer of the Cognitive Science Society from 2001-2003.

Users Review

From reader reviews:

Teresa Powers:

Spent a free a chance to be fun activity to accomplish! A lot of people spent their down time with their family, or all their friends. Usually they carrying out activity like watching television, likely to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Will you something different to fill your free time/ holiday? Could possibly be reading a book is usually option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of book that you should read. If you want to consider look for book, may be the reserve untitled Cognitive Psychology can be great book to read. May be it might be best activity to you.

Clarence Nelson:

This Cognitive Psychology is great book for you because the content and that is full of information for you who all always deal with world and still have to make decision every minute. This particular book reveal it details accurately using great organize word or we can claim no rambling sentences inside. So if you are read it hurriedly you can have whole info in it. Doesn't mean it only gives you straight forward sentences but tricky core information with splendid delivering sentences. Having Cognitive Psychology in your hand like keeping the world in your arm, information in it is not ridiculous one. We can say that no e-book that offer you world in ten or fifteen tiny right but this book already do that. So , this really is good reading book. Hello Mr. and Mrs. hectic do you still doubt which?

John Sorrells:

That reserve can make you to feel relax. This book Cognitive Psychology was colorful and of course has pictures around. As we know that book Cognitive Psychology has many kinds or genre. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and think you are the character on there. So , not at all of book are generally make you bored, any it offers you feel happy, fun and unwind. Try to choose the best book to suit your needs and try to like reading in which.

Pablo Cowart:

Some people said that they feel weary when they reading a book. They are directly felt it when they get a half portions of the book. You can choose the actual book Cognitive Psychology to make your current reading is interesting. Your skill of reading ability is developing when you like reading. Try to choose easy book to make you enjoy to see it and mingle the feeling about book and reading through especially. It is to be initial opinion for you to like to wide open a book and read it. Beside that the guide Cognitive Psychology can to be your friend when you're feel alone and confuse with the information must you're doing of their time.
