Reflection Groups and Coxeter Groups (Cambridge Studies in Advanced Mathematics) By James E. Humphreys

In this graduate textbook Professor Humphreys presents a concrete and up-to-date introduction to the theory of Coxeter groups. He assumes that the reader has a good knowledge of algebra, but otherwise the book is self contained. The first part is devoted to establishing concrete examples; the author begins by developing the most important facts about finite reflection groups and related geometry, and showing that such groups have a Coxeter representation. In the next chapter these groups are classified by Coxeter diagrams, and actual realizations of these groups are discussed. Chapter 3 discusses the polynomial invariants of finite reflection groups, and the first part ends with a description of the affine Weyl groups and the way they arise in Lie theory. The second part (which is logically independent of, but motivated by, the first) starts by developing the properties of the Coxeter groups. Chapter 6 shows how earlier examples and others fit into the general classification of Coxeter diagrams. Chapter 7 is based on the very important work of Kazhdan and Lusztig and the last chapter presents a number of miscellaneous topics of a combinatorial nature.

Editorial Review

Review

"This is a book which can be recommended to both beginners and more experienced workers with an interest in Coxeter groups. In common with all of Humphrey's books, it is written in a clear and helpful expository style, and so gives an excellent introduction to the subject. At the same time the material dealing with recent developments such as Kazhdan-Lusztig theory will be most useful to specialists in the area." Bulletin of the London Mathematical Society

"...a useful book. The style is informal and the arguments are clear." Louis Solomon, Mathematical Reviews

About the Author

James E. Humphreys was born in Erie, Pennsylvania, and received his A.B. from Oberlin College, 1961, and his Ph.D. from Yale University, 1966. He has taught at the University of Oregon, Courant Institute (NYU), and the University of Massachusetts at Amherst (now retired). He visits IAS Princeton, Rutgers. He is the author of several graduate texts and monographs.

Users Review

From reader reviews:

Micheal Taylor:

What do you concerning book? It is not important together with you? Or just adding material when you really need something to explain what your own problem? How about your spare time? Or are you busy man? If you don't have spare time to accomplish others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Every person has many questions above. They have to answer that question simply because just their can do this. It said that about reserve. Book is familiar on every person. Yes, it is suitable. Because start from on pre-school until university need this specific Reflection Groups and Coxeter Groups (Cambridge Studies in Advanced Mathematics) to read.

Andrew Comer:

As people who live in the actual modest era should be update about what going on or details even knowledge to make these people keep up with the era that is certainly always change and progress. Some of you maybe can update themselves by reading through books. It is a good choice for yourself but the problems coming to you is you don't know what type you should start with. This Reflection Groups and Coxeter Groups (Cambridge Studies in Advanced Mathematics) is our recommendation so you keep up with the world. Why, because this book serves what you want and want in this era.

Mac Cutter:

Reading a e-book can be one of a lot of pastime that everyone in the world really likes. Do you like reading

book consequently. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new details. When you read a reserve you will get new information simply because book is one of numerous ways to share the information or maybe their idea. Second, reading a book will make an individual more imaginative. When you reading a book especially tale fantasy book the author will bring you to definitely imagine the story how the characters do it anything. Third, you are able to share your knowledge to others. When you read this Reflection Groups and Coxeter Groups (Cambridge Studies in Advanced Mathematics), you could tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire others, make them reading a book.

Mary Clement:

Reading a publication tends to be new life style in this particular era globalization. With looking at you can get a lot of information which will give you benefit in your life. Together with book everyone in this world can easily share their idea. Guides can also inspire a lot of people. A lot of author can inspire their reader with their story or their experience. Not only the storyline that share in the books. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors on earth always try to improve their talent in writing, they also doing some study before they write with their book. One of them is this Reflection Groups and Coxeter Groups (Cambridge Studies in Advanced Mathematics).
