Structural Analysis: A Unified Classical and Matrix Approach (Spon Text)

By Amin Ghali, Adam Neville, Tom G. Brown

This comprehensive textbook, now in its sixth edition, combines classical and matrix-based methods of structural analysis and develops them concurrently. New solved examples and problems have been added, giving over 140 worked examples and more than 400 problems with answers.

The introductory chapter on structural analysis modelling gives a good grounding to the beginner, showing how structures can be modelled as beams, plane or space frames and trusses, plane grids or assemblages of finite element. Idealization of loads, anticipated deformations, deflected shapes and bending moment diagrams are presented. Readers are also shown how to idealize real three-dimensional structures into simplified models that can be analyzed with little or no calculation, or with more involved calculations using computers. Dynamic analysis, essential for structures subject to seismic ground motion, is further developed in this edition and in a code-neutral manner. The topic of structural reliability analysis is discussed in a new chapter.

Translated into six languages, this textbook is of considerable international renown, and is widely recommended by many civil and structural engineering lecturers to their students because of its clear and thorough style and content.

Structural Analysis: A Unified Classical and Matrix Approach (Spon Text) By Amin Ghali, Adam Neville, Tom G. Brown **Bibliography**

- Rank: #662910 in Books
- Brand: Brand: CRC Press
- Published on: 2009-04-02
- Original language: English
- Number of items: 1
- Dimensions: 9.69" h x 1.71" w x 7.44" l, 3.60 pounds
- Binding: Paperback
- 864 pages

Editorial Review

Review

'This book has much to commend it. It will be of use to a student as a standard work on indeterminate structures. The work will also be of interest to an older engineer who studied his theory of structures before matrix methods were introduced. The book will enable him to see the relations between the new and old methods and bridge the gap between the two.' - Magazine of Concrete Research 'A virtual encyclopaedia of structural analysis' - Choice 'Undoubtedly one of the best and most comprehensive books written on the subject' - Endeavour 'The book is exemplary and stimulating for the future shaping of education in structural analysis.' Der Bauingenieur (translation from German)

About the Author

Amin Ghali is Fellow of the Canadian Academy of Engineering and Professor Emeritus in the Civil Engineering Department of the University of Calgary, Canada

Adam Neville is former Vice President of the Royal Academy of Engineering and former Principal and Vice-Chancellor of the University of Dundee, Scotland

Tom G. Brown is Professor and Head of the Civil Engineering Department of the University of Calgary, Canada

Users Review

From reader reviews:

Andrew Drake:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to be aware of everything in the world. Each guide has different aim or even goal; it means that publication has different type. Some people sense enjoy to spend their the perfect time to read a book. They are reading whatever they consider because their hobby is usually reading a book. Why not the person who don't like reading through a book? Sometime, person feel need book when they found difficult problem or even exercise. Well, probably you will require this Structural Analysis: A Unified Classical and Matrix Approach (Spon Text).

Larry Swartz:

Inside other case, little persons like to read book Structural Analysis: A Unified Classical and Matrix Approach (Spon Text). You can choose the best book if you appreciate reading a book. As long as we know about how is important a new book Structural Analysis: A Unified Classical and Matrix Approach (Spon Text). You can add information and of course you can around the world by just a book. Absolutely right, simply because from book you can learn everything! From your country till foreign or abroad you may be

known. About simple issue until wonderful thing you are able to know that. In this era, you can open a book or searching by internet product. It is called e-book. You can utilize it when you feel fed up to go to the library. Let's examine.

Calvin Lee:

The book Structural Analysis: A Unified Classical and Matrix Approach (Spon Text) make one feel enjoy for your spare time. You need to use to make your capable a lot more increase. Book can to become your best friend when you getting strain or having big problem together with your subject. If you can make reading a book Structural Analysis: A Unified Classical and Matrix Approach (Spon Text) for being your habit, you can get considerably more advantages, like add your own personal capable, increase your knowledge about many or all subjects. You are able to know everything if you like wide open and read a publication Structural Analysis: A Unified Classical and Matrix Approach (Spon Text). Kinds of book are several. It means that, science book or encyclopedia or other individuals. So , how do you think about this reserve?

Whitney Orteiz:

This Structural Analysis: A Unified Classical and Matrix Approach (Spon Text) are reliable for you who want to be considered a successful person, why. The explanation of this Structural Analysis: A Unified Classical and Matrix Approach (Spon Text) can be on the list of great books you must have will be giving you more than just simple studying food but feed an individual with information that might be will shock your earlier knowledge. This book is definitely handy, you can bring it everywhere and whenever your conditions in the e-book and printed versions. Beside that this Structural Analysis: A Unified Classical and Matrix Approach (Spon Text) giving you an enormous of experience for example rich vocabulary, giving you trial run of critical thinking that we understand it useful in your day exercise. So , let's have it and enjoy reading.
