Environmental Toxicants: Human Exposures and Their Health Effects By Morton Lippmann

A comprehensive guide to assessing the health effects of environmental toxicants in nonoccupational settings

Now in a second edition, *Environmental Toxicants: Human Exposures and Their Health Effects* continues to offer a unique perspective on a topic that is usually focused on exposure and effects in industrial settings. Fully revised and expanded, it presents comprehensive, cutting-edge information on the effects of human exposure to selected chemicals and physical agents in nonoccupational environments. Dr. Morton Lippmann assembles expert contributions by leading authorities on each of the twenty-five environmental agents examined, providing a critical review of the accumulated evidence concerning their known or likely impact on human health, especially after long-term exposure.

Six new chapters have been added to this edition, discussing ambient particulate matter, chromium, mercury, noise, pesticides, and ultraviolet radiation. Existing chapters have been updated to include the most current information on performing risk assessments for established toxicants—from asbestos and benzene to the sick building syndrome. In the closing chapters, the authors place the discussion in a broader social and scientific context, exploring such issues as individual and community risk, environmental engineering for risk reduction, pulmonary medicine, and lessons learned in the industrial sector.

Supplemented with more than 100 illustrations and photographs, and with a view to future research trends, *Environmental Toxicants: Human Exposures and Their Health Effects* is an indispensable guide for public health officials, industrial hygienists, epidemiologists, and primary care physicians involved in risk assessment and management for exposed individuals and populations.

Editorial Review

From the Back Cover

Current knowledge on the health effects of toxicants in the ambient environment. Now in a second edition, *Environmental Toxicants: Human Exposures and Their Health Effects* continues to offer a unique perspective on a topic that is usually focused on exposure and effects in industrial settings. Fully revised and expanded, it presents comprehensive, cutting-edge information on the effects of human exposure to selected chemicals and physical agents in nonoccupational environments. Dr. Morton Lippmann assembles expert contributions by leading authorities on each of the 25 environmental agents examined, providing a critical review of the accumulated evidence concerning their known or likely impact on human health, especially after long-term exposure.

Six new chapters have been added to this edition, discussing ambient particulate matter, chromium, mercury, noise, pesticides, and ultraviolet radiation. Existing chapters have been updated to include the most current information on performing risk assessments for established toxicants- from asbestos and benzene to the sick building syndrome. In the closing chapters, the authors place the discussion in a broader social and scientific context, exploring such issues as individual and community risk, environmental engineering for risk reduction, pulmonary medicine, and lessons learned in the industrial sector.

Supplemented with more than 100 illustrations and photographs, and with a view to future research trends, *Environmental Toxicants: Human Exposures and Their Health Effects* is an indispensable guide for public health officials, industrial hygienists, epidemiologists, and primary care physicians involved in risk assessment and management for exposed individuals and populations.

About the Author

MORTON LIPPMANN, PhD, is Professor of Environmental Medicine at the New York University School of Medicine, and the Director of the Research Center for the Health Risks of Ambient Particulate Matter, supported by the U.S. Environmental Protection Agency. He also directs the Human Exposure and Health Effects Research Program at New York University's Nelson Institute of Environmental Medicine.

Users Review

From reader reviews:

Melissa Conner:

As people who live in often the modest era should be change about what going on or information even knowledge to make all of them keep up with the era which can be always change and move forward. Some of you maybe will certainly update themselves by reading through books. It is a good choice for you personally but the problems coming to anyone is you don't know what type you should start with. This *Environmental Toxicants: Human Exposures and Their Health Effects* is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

Carolyn Foley:

A lot of people always spent their free time to vacation or even go to the outside with them family members or their friend. Are you aware? Many a lot of people spent they will free time just watching TV, or even playing video games all day long. If you want to try to find a new activity that's look different you can read some sort of book. It is really fun for you personally. If you enjoy the book which you read you can spent 24 hours a day to reading a e-book. The book Environmental Toxicants: Human Exposures and Their Health Effects it is rather good to read. There are a lot of those who recommended this book. These were enjoying reading this book. If you did not have enough space bringing this book you can buy the e-book. You can m0ore simply to read this book from a smart phone. The price is not to fund but this book has high quality.

Jeffrey Martinez:

That reserve can make you to feel relax. This kind of book Environmental Toxicants: Human Exposures and Their Health Effects was multi-colored and of course has pictures on the website. As we know that book Environmental Toxicants: Human Exposures and Their Health Effects has many kinds or type. Start from kids until teenagers. For example Naruto or Private investigator Conan you can read and think you are the character on there. Therefore not at all of book usually are make you bored, any it can make you feel happy, fun and relax. Try to choose the best book to suit your needs and try to like reading this.

Debra Daniel:

Reading a book make you to get more knowledge from that. You can take knowledge and information from your book. Book is written or printed or descriptive from each source that filled update of news. On this modern era like right now, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just trying to find the Environmental Toxicants: Human Exposures and Their Health Effects when you required it?
