A Journey into Gravity and Spacetime ("Scientific American" Library) By John Archibald Wheeler

Gravity is not a force acting at a distance. It is mass gripping spacetime, telling it how to curve, and spacetime gripping mass, telling it how to move. According to preeminent physicist John Archibald Wheeler, gravity makes the closest connection between the world we see around us and the inner-most workings of the universe.

In this imaginative volume, Wheeler explores gravity and spacetime by applying Einstein's battle-tested theory to both familiar and exotic phenomena-- everything from flying tennis balls, to hurling gravity waves from crashing stars, the motion of the planets, and the collapse of a star into a black hole. It's a provocative, revealing, fully engaging scientific journey led by a frontline participant in the most important work in physics in the last 50 years.

Editorial Review

Review

"*Journey into Gravity and Spacetime* is a colorful and imaginative introduction to a topical subject, delightfully produced. Wheeler complements his subject by continually demonstrating its underlying simplicity, in the face of the apparent magnitude of the task. I recommend this book to anyone wishing to gain an honest insight into the wonders of gravity and the physics of spacetime." -- *Times Higher Education Supplement*

"A thorough exploration of Einstein's geometric theory of gravity and its implications for the relationship between mass and spacetime." -- *Nature*

"I am reading Wheeler so that I can write more intelligently about Einstein's general theory of relativity." -- *Isaac Asimov, Night Table Reading, Vanity Fair*

"Wheeler takes the reader into a world of space-time, gravitational waves, and black holes. As one of the foremost contributors to the study of relativity, and as the person mainly responsible for the resurgence of interest in general relativity in the 1960s, he is well qualified to write such a book. . . . Strongly recommended." -- *Choice*

About the Author

John Archibald Wheeler is Joseph Henry Professor Emeritus at Princeton University and was, until his retirement, Blumberg Professor of Physics and Director, Center for Theoretical Physics at the University of Texas at Austin. A past president of the American Physical Society, he is a recipient of the Enrico Fermi Award (1968), the National Medal of Science (1971), the Niels Bohr International Gold Medal (1982) and the Wolf Prize (1997).

Users Review

From reader reviews:

Margaret Coleman:

Hey guys, do you would like to finds a new book you just read? May be the book with the title A Journey into Gravity and Spacetime ("Scientific American" Library) suitable to you? Often the book was written by renowned writer in this era. Typically the book untitled A Journey into Gravity and Spacetime ("Scientific American" Library)is the main of several books this everyone read now. This specific book was inspired many people in the world. When you read this publication you will enter the new way of measuring that you ever know just before. The author explained their thought in the simple way, and so all of people can easily to know the core of this book. This book will give you a lot of information about this world now. In order to see the represented of the world in this particular book.

Hazel Fletcher:

The actual book A Journey into Gravity and Spacetime ("Scientific American" Library) will bring you to the new experience of reading a new book. The author style to explain the idea is very unique. Should you try to find new book to read, this book very ideal to you. The book A Journey into Gravity and Spacetime ("Scientific American" Library) is much recommended to you you just read. You can also get the e-book from your official web site, so you can more readily to read the book.

Vincent Olson:

In this period globalization it is important to someone to find information. The information will make a professional understand the condition of the world. The condition of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. Typically the book that recommended for you is A Journey into Gravity and Spacetime ("Scientific American" Library) this publication consist a lot of the information from the condition of this world now. This particular book was represented how do the world has grown up. The dialect styles that writer use for explain it is easy to understand. The writer made some study when he makes this book. Here is why this book suited all of you.

Sean Ward:

Beside that A Journey into Gravity and Spacetime ("Scientific American" Library) in your phone, it could possibly give you a way to get nearer to the new knowledge or data. The information and the knowledge you are going to got here is fresh in the oven so don't possibly be worry if you feel like an aged people live in narrow community. It is good thing to have A Journey into Gravity and Spacetime ("Scientific American" Library) because this book offers for your requirements readable information. Do you oftentimes have book but you rarely get what it's all about. Oh come on, that would not happen if you have this inside your hand. The Enjoyable set up here cannot be questionable, including treasuring beautiful island. So do you still want to miss that? Find this book and also read it from at this point!
