Cardiovascular Magnetic Resonance (Oxford Specialist Handbooks in Cardiology) By Saul G. Myerson, Jane Francis, Stefan Neubauer

Cardiovascular Magnetic Resonance (CMR) is a rapidly expanding imaging method in cardiology which provides unparalleled diagnostic information about the heart. It is however a complex technique and though the availability of scanners is increasing quickly, the expertise required to perform the scans is limited. While no book is a substitute for experience, this handbook provides an invaluable guide to performing and interpreting the scans which should aid both new and experienced operators.

Cardiovascular Magnetic Resonance is an indispensable guide to performing and interpreting CMR scans. What to look for, which sequences to include, how to acquire them, and how to interpret the images are all included in the handbook. The information is provided in a quick-reference, easy-to-use format with many images from real cases, and is designed to sit on the scanning console or in the office, providing a step-by-step guide to aid the CMR practitioner at every stage. All areas of cardiovascular imaging are covered, including tips and tricks for optimal imaging and how to avoid and spot artefacts. From patient safety to differential diagnoses of tricky images, to an easy to understand section on the science behind magnetic resonance, all aspects are covered in this concise yet comprehensive guide to this specialist area. Whether a novice or expert in the field, all readers should find this book a useful tool. It is an invaluable reference that no CMR department should be without.

Editorial Review

Review

Overall, this is an excellent book that certainly fulfils the authors' description as a practical guide; however the book goes beyond this and will form a useful reference for both trainees and more experienced reporters alike. The book fills a niche between very basic pocket texts and the reference tomes. I will be recommending this book to all my CMR trainees as they start out in this field. Cardiology News

About the Author

Saul G. Myerson, *Honorary Consultant Cardiologist and Clinical Fellow, University of Oxford Centre for Clinical Magnetic Resonance Research, Department of Cardiovascular Medicine, John Radcliffe Hospital, Oxford, UK*, Jane Francis, *Chief Technologist, University of Oxford Centre for Clinical Magnetic Resonance Research, Department of Cardiovascular Medicine, John Radcliffe Hospital, Oxford, UK*, Stefan Neubauer, *Professor of Cardiovascular Medicine and Clinical Director, University of Oxford Centre for Clinical Magnetic Resonance Research, Department of Cardiovascular Medicine, John Radcliffe Hospital, Oxford, UK*

Saul Myerson is an honorary consultant cardiologist at the Department of Cardiovascular Medicine, John Radcliffe Hospital in Oxford. His clinical and research interests are in cardiovascular magnetic resonance and other non-invasive cardiac imaging and he has been performing CMR for over 10 years. He has published widely, is editor of *Emergencies in Cardiology* and a clinical fellow at the University of Oxford. He was president of the British Junior Cardiologists Association from 2005-2007.

Jane Francis is a career imaging technologist. Always ready for a challenge, she has worked in a varied number of positions before specialising in cardiac magnetic resonance. In 2002 Jane was appointed as the chief technologist at the University of Oxford Centre for Clinical Magnetic Resonance Research where she is involved not only in clinical cardiac MR but clinical research and imaging trials. She is the author and co-author of more than 100 peer-reviewed papers, posters and abstracts. She has been invited to speak on various aspects of cardiac MR both nationally and internationally and is an active member of the Society for Cardiovascular Magnetic Resonance, being a founding member of the technologists' committee and the chair from 2004-2006.

Stefan Neubauer is Professor of Cardiovascular Medicine and Clinical Director of the University of Oxford Centre for Clinical Magnetic Resonance Research (OCMR) at the Department of Cardiovascular Medicine, John Radcliffe Hospital, Oxford. His clinical work and research over the past 20 years has been devoted to the development and application of CMR. He has published more than 200 original research articles. Editorial positions and contributions to scientific bodies include his involvement with the Society for Cardiovascular Magnetic Resonance (President 2006-2007), Chairman of the British Society for Cardiovascular Magnetic Resonance, Associate Editor of the *Journal of Cardiovascular Magnetic Resonance*, Co-Editor of *Magnetic Resonance Materials*. Awards and Honours include the American Heart Association Paul Dudley White International Lectureship Award 2005 and the British Cardiovascular Society Thomas Lewis Lecture 2008.

Users Review

From reader reviews:

David Robinson:

Book is to be different for each grade. Book for children until eventually adult are different content. As we know that book is very important normally. The book Cardiovascular Magnetic Resonance (Oxford Specialist Handbooks in Cardiology) ended up being making you to know about other expertise and of course you can take more information. It doesn't matter what advantages for you. The publication Cardiovascular Magnetic Resonance (Oxford Specialist Handbooks in Cardiology) is not only giving you much more new information but also to get your friend when you feel bored. You can spend your own spend time to read your guide. Try to make relationship while using book Cardiovascular Magnetic Resonance (Oxford Specialist Handbooks in Cardiology). You never truly feel lose out for everything in case you read some books.

Kathy Vaughn:

The book with title Cardiovascular Magnetic Resonance (Oxford Specialist Handbooks in Cardiology) includes a lot of information that you can learn it. You can get a lot of help after read this book. This specific book exist new knowledge the information that exist in this reserve represented the condition of the world today. That is important to yo7u to know how the improvement of the world. This kind of book will bring you with new era of the glowbal growth. You can read the e-book with your smart phone, so you can read that anywhere you want.

Marina Espinal:

The book untitled Cardiovascular Magnetic Resonance (Oxford Specialist Handbooks in Cardiology) contain a lot of information on the item. The writer explains the woman idea with easy approach. The language is very simple to implement all the people, so do not really worry, you can easy to read the idea. The book was published by famous author. The author gives you in the new age of literary works. It is easy to read this book because you can continue reading your smart phone, or model, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official website as well as order it. Have a nice study.

Lena Lewis:

You may spend your free time to study this book this book. This Cardiovascular Magnetic Resonance (Oxford Specialist Handbooks in Cardiology) is simple to develop you can read it in the playground, in the beach, train and also soon. If you did not get much space to bring often the printed book, you can buy the particular e-book. It is make you better to read it. You can save often the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.
