Editorial Review

Review

This is not just a textbook; it is an extraordinary 'toolkit'... probably the book that better serves the cardiovascular specialist in day-to-day practice than any other written in the last two decades Dr Fuster, Mount Sinai Hospital, USA I wholeheartedly recommend this book to medical students, trainees, and specialists who have a thirst for updated, easily available information. Professor Panos Vardas, Hellenic Journal of Cardiology Written by renowned experts in cardiology, this unique, concise, and very clearly written book incorporates both all current ACCF/AHA and ESC Guidelines and the latest scientific knowledge. Therefore, it could become a leading comprehensive compendium in cardiology. European Heart Journal

About the Author

Demosthenes Katritsis, Director, Dept Cardiology, Athens Euroclinic, Greece Hon Consultant Cardiologist, St Thomas' Hospital, London, UK. Bernard J. Gersh, Professor of Medicine, Internal Medicine and Cardiovascular Diseases, Mayo Graduate School of Medicine

Dr Katritsis performs all kinds of interventional cardiology procedures such as coronary angioplasty, mitral valvuloplasty, percutaneous cardiac defects closure, and TAVI procedures. In addition, he has extensive experience in all aspects of electrophysiology such as diagnostic electrophysiology studies, catheter ablation procedures, and implantation of biventricular pacemakers and defibrillators.

Dr Katritsis runs an active, multidisciplinary research program and has published over 220 original articles in international journals on most aspects of cardiology but mainly on interventional cardiology, coronary circulation, and ablation of arrhythmias. He has participated in most European and American textbooks of cardiology with contribution of chapters.

Professor John Camm qualified in 1971. He worked at Guy's Hospital before working at St. Bartholomew's Hospital, London. In 1986 he moved to St. George's Hospital Medical School in London as Professor of Clinical Cardiology (British Heart Foundation). Professor Camm was elected the Chairman of Medicine in October 1990, a post rotated from in 1995. He is now the Chairman of the Division of Cardiac and Vascular Sciences at St. George's University of London. His major speciality is cardiac arrhythmias but he is also much involved in clinical cardiac electrophysiology, cardiac pacemakers, risk stratification in post myocardial infarction, heart failure and cardiomyopathy patients. He has a major interest in cardiovascular safety of cardiac and non-cardiac drugs. John has given over 1500 lectures to national and international audiences, written more than 1000 peer review papers and over 250 detailed reviews. He has authored and edited numerous books.

Dr. Gersh's wide interests include the natural history and therapy of acute and chronic coronary artery disease, clinical electrophysiology and in particular atrial fibrillation and sudden cardiac death, the cardiomyopathies and the clinical implications of molecular genetics in hypertrophic cardiomyopathy, cardiac stem cell therapy and the epidemiology of cardiovascular disease in the developing world. Dr. Gersh is the editor of 13 books and is on the editorial board of 25 journals including Circulation, Journal of the American College of Cardiology (Senior Consulting Editor), Nature Cardiovascular Medicine, and The European Heart Journal (2009 Deputy Editor). He is a member of the Advisory Board of the Reynolds Foundation, a Past Chairman of the Council of Clinical Cardiology of the American Heart Association, an at large member of the World Heart Federation's Scientific and Policy Initiatives Committee (SPIC).

Users Review

From reader reviews:

Tanya Minor:

In this 21st one hundred year, people become competitive in most way. By being competitive right now, people have do something to make all of them survives, being in the middle of the crowded place and notice through surrounding. One thing that oftentimes many people have underestimated this for a while is reading. Sure, by reading a e-book your ability to survive enhance then having chance to endure than other is high. For you personally who want to start reading any book, we give you this kind of Clinical Cardiology: Current Practice Guidelines book as beginning and daily reading reserve. Why, because this book is more than just a book.

Charles Trask:

Information is provisions for individuals to get better life, information these days can get by anyone at everywhere. The information can be a expertise or any news even an issue. What people must be consider when those information which is inside former life are challenging to be find than now's taking seriously which one is suitable to believe or which one the resource are convinced. If you obtain the unstable resource then you have it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Clinical Cardiology: Current Practice Guidelines as the daily resource information.

Ruth Davis:

Reading a reserve tends to be new life style on this era globalization. With reading you can get a lot of information which will give you benefit in your life. Having book everyone in this world can certainly share their idea. Books can also inspire a lot of people. Plenty of author can inspire their reader with their story or perhaps their experience. Not only the story that share in the guides. But also they write about the ability about something that you need example of this. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors on this planet always try to improve their talent in writing, they also doing some exploration before they write with their book. One of them is this Clinical Cardiology: Current Practice Guidelines.

Michael Ogden:

Do you like reading a guide? Confuse to looking for your preferred book? Or your book was rare? Why so many concern for the book? But any kind of people feel that they enjoy for reading. Some people likes studying, not only science book but novel and Clinical Cardiology: Current Practice Guidelines or even others sources were given know-how for you. After you know how the great a book, you feel would like to read more and more. Science publication was created for teacher or maybe students especially. Those books are helping them to put their knowledge. In some other case, beside science book, any other book likes Clinical Cardiology: Current Practice Guidelines to make your spare time far more colorful. Many types of book like this one.
