About the Author

Jeremy Zawodny and his two cats moved from Northwest Ohio to Silicon Valley in late 1999 so he could work for Yahoo!--just in time to witness the .com bubble bursting first-hand. He's been at Yahoo!® ever since, helping to put MySQL and other Open Source technologies to use in fun, interesting, and often very big ways. Starting with the popular and high-traffic Yahoo! Finance site, he worked to make MySQL part of the site's core infrastructure in large batch operations as well as real-time feed processing and serving content directly on the site. He then helped to spread "the MySQL religion" to numerous other groups within Yahoo!, including News, Personals, Sports, and Shopping. Nowadays he acts as Yahoo!'s MySQL guru, working with Yahoo!'s many engineering groups to get the most out of their MySQL deployments.

In 2000, he began writing for Linux Magazine and continues to do so today as a columnist and contributing editor. After over a year of active participation on the MySQL mailing list, he got the idea to write a book about MySQL. (How hard could it be, really?) You can still find him answering questions on the list today. Since 2001, Jeremy has been speaking about MySQL at various conferences (O'Reilly's Open Source Conference, PHPCon, The MySQL User Conference, etc.) and user groups in locations as far away as Bangalore, India. His favorite topics are performance tuning, replication, clustering, and backup/recovery. In more recent times, he's rediscovered his love of aviation, earning a Private Pilot Glider license in early 2003. Since then he's spent far too much of his free time flying gliders out of Hollister, California and Truckee, near Lake Tahoe. He hopes to soon earn his Commercial Pilot license and then go on to become a certified flight instructor someday. Occasional MySQL consulting also helps to pay for his flying addiction.

Jeremy rambles almost daily about technology and life in general on his weblog:

Derek J. Balling has been a Linux system administrator since 1996. He has helped build and maintain server infrastructure for companies like Yahoo, and institutions like Vassar College. He has also written articles for The Perl Journal and a number of online magazines, and served on the Program Committee for the 2008 LISA (Large Installation System Administration) Conference. He is currently employed as the Data Center Manager for Answers.com.

When not working on computer-related issues, Derek enjoys spending time with his wife Debbie, and their posse of animals (four cats and a dog). He also makes his opinion known on current events or whatever is annoying him lately on his blog at <http://blog.megacity.org/>.
