Islamic Technology: An Illustrated History By Ahmad Y. al-Hassan, Donald R. Hill

Although the contributions of Islamic civilisations to science have long been recognised, the application of this scientific expertise to technology had been neglected until the publication of this then pioneering 1986 text. The book begins to remedy that neglect, first by celebrating the richness and ingenuity of the world of Islamic technology and then by pointing the way forward to its more detailed exploration. Lavishly illustrated, this book explores the major technological achievements of Islamic civilisations, namely the public works of civil engineering, the machines and mechanical devices which served to control water, provide power, serve as instruments or to amuse.

Editorial Review

Review

'... a wide-ranging survey of the technology used by Muslims in the Medieval period - and also today ... It deserves to succeed in bringing its subject to a new audience in the West as well as instilling pride in past achievements in the Middle East.' History Today

Users Review

From reader reviews:

Sharon Chacko:

Now a day people who Living in the era wherever everything reachable by connect with the internet and the resources included can be true or not call for people to be aware of each info they get.
