**Engineering Design Process** By Yousef Haik, Tamer M. Shahin, Sangarappillai Sivaloganathan

This book is dedicated to the essential components of the design process and uses case studies, labs, and group projects to show their application. With explicit guidance, students learn that the design process is a set of procedures that will help them solve engineering problems. Yousef Haik and Tamer Shahin illustrate the critical steps of the design process, including articulating the problem, market analysis, function analysis, developing concepts, evaluating alternatives, and marketing, while facilitating hands-on learning and teamwork opportunities through labs and class-tested design problems.

## **Editorial Review**

### **Review**

"The author does a good job of introducing terms in a clear manner to avoid confusion. The examples are well thought out and are also easy to follow to see the application of material presented in the chapters."

### **About the Author**

Yousef Haik is currently serving as a Professor of Sustainable Development at the College of Science and Engineering at Hamad Bin Khalifa University. His academic career has included appointments in engineering (Mechanical, Biomedical, Nanoengineering and Sustainable Development) and science (Medicinal Chemistry, Physics and Nanoscience) programs. His teaching and research interest include engineering design, nanotechnology, MEMS and fluid dynamics.

Tamer Shahin is the Chief Executive officer at the Nuviun Company. He served as an Associate Professor in Mechanical Engineering at The Petroleum Institute, United Arab Emirates University, as well as at King's College London, UK. His teaching and research interests include engineering design process, computer-aided design, product innovation and process management, engineering ethics, and design automation and optimization.

Sangarappillai Sivaloganathan is an Associate Professor in Mechanical Engineering at the United Arab Emirates University. Prior to joining UAEU, he was an Associate Professor at Brunel University, UK. His teaching and research interests include the engineering design process, computer-aided design, product innovation and process management.

## **Users Review**

### **From reader reviews:**

#### **Janet Smith:**

What do you regarding book? It is not important along with you? Or just adding material when you need something to explain what yours problem? How about your spare time? Or are you busy particular person? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? All people has many questions above. They have to answer that question mainly because just their can do that. It said that about e-book. Book is familiar on every person. Yes, it is appropriate. Because start from on jardín de infancia until university need this kind of Engineering Design Process to read.

#### **Dedra Clark:**

In this 21st hundred years, people become competitive in most way. By being competitive currently, people have do something to make these survives, being in the middle of the crowded place and notice simply by surrounding. One thing that at times many people have underestimated the item for a while is reading. That's why, by reading a guide your ability to survive boost then having chance to remain than other is high. To suit your needs who want to start reading a book, we give you this specific Engineering Design Process book as

beginning and daily reading publication. Why, because this book is more than just a book.

**Carol Anthony:**

Engineering Design Process can be one of your beginning books that are good idea. All of us recommend that straight away because this e-book has good vocabulary which could increase your knowledge in language, easy to understand, bit entertaining however delivering the information. The copy writer giving his/her effort to place every word into satisfaction arrangement in writing Engineering Design Process but doesn't forget the main position, giving the reader the hottest in addition to based confirm resource details that maybe you can be among it. This great information can certainly drawn you into brand new stage of crucial thinking.

**Ann Strickland:**

As we know that book is significant thing to add our knowledge for everything. By a e-book we can know everything you want. A book is a list of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This guide Engineering Design Process was filled concerning science. Spend your spare time to add your knowledge about your scientific research competence. Some people has several feel when they reading some sort of book. If you know how big benefit of a book, you can feel enjoy to read a publication. In the modern era like at this point, many ways to get book that you simply wanted.
