**Paraconsistent Logic: Consistency, Contradiction and Negation (Logic, Epistemology, and the Unity of Science)** By Walter Carnielli, Marcelo Esteban Coniglio

This book is the first in the field of paraconsistency to offer a comprehensive overview of the subject, including connections to other logics and applications in information processing, linguistics, reasoning and argumentation, and philosophy of science. It is recommended reading for anyone interested in the question of reasoning and argumentation in the presence of contradictions, in semantics, in the paradoxes of set theory and in the puzzling properties of negation in logic programming. Paraconsistent logic comprises a major logical theory and offers the broadest possible perspective on the debate of negation in logic and philosophy. It is a powerful tool for reasoning under contradictoriness as it investigates logic systems in which contradictory information does not lead to arbitrary conclusions. Reasoning under contradictions constitutes one of most important and creative achievements in contemporary logic, with deep roots in philosophical questions involving negation and consistency

This book offers an invaluable introduction to a topic of central importance in logic and philosophy. It discusses (i) the history of paraconsistent logic; (ii) language, negation, contradiction, consistency and inconsistency; (iii) logics of formal inconsistency (LFIs) and the main paraconsistent propositional systems; (iv) many-valued companions, possible-translations semantics and non-deterministic semantics; (v) paraconsistent modal logics; (vi) first-order paraconsistent logics; (vii) applications to information processing, databases and quantum computation; and (viii) applications to deontic paradoxes, connections to Eastern thought and to dialogical reasoning.

### Editorial Review

#### Review

“This is a formal book focusing on logics of formal inconsistency (LFI). … the authors focus on various issues in philosophy of science and do a great job to exhibit the breadth and depth of LFIs. … the book is very thought-provoking, which is a great advantage of researchers. … This book is a first step to identify, understand and explore these questions.” (Can Baskent, zbMATH 1355.03001, 2017)

#### From the Back Cover

This book is the first in the field of paraconsistency to offer a comprehensive overview of the subject, including connections to other logics and applications in information processing, linguistics, reasoning and argumentation, and philosophy of science. It is recommended reading for anyone interested in the question of reasoning and argumentation in the presence of contradictions, in semantics, in the paradoxes of set theory and in the puzzling properties of negation in logic programming. Paraconsistent logic comprises a major logical theory and offers the broadest possible perspective on the debate of negation in logic and philosophy. It is a powerful tool for reasoning under contradictoriness as it investigates logic systems in which contradictory information does not lead to arbitrary conclusions. Reasoning under contradictions constitutes one of most important and creative achievements in contemporary logic, with deep roots in philosophical questions involving negation and consistency

This book offers an invaluable introduction to a topic of central importance in logic and philosophy. It discusses (i) the history of paraconsistent logic; (ii) language, negation, contradiction, consistency and inconsistency; (iii) logics of formal inconsistency (LFIs) and the main paraconsistent propositional systems; (iv) many-valued companions, possible-translations semantics and non-deterministic semantics; (v) paraconsistent modal logics; (vi) first-order paraconsistent logics; (vii) applications to information processing, databases and quantum computation; and (viii) applications to deontic paradoxes, connections to Eastern thought and to dialogical reasoning.

### Users Review

#### From reader reviews:

##### **Joe Vizcarra:**

What do you concerning book? It is not important together with you? Or just adding material when you require something to explain what your own problem? How about your extra time? Or are you busy particular person? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Every individual has many questions above. The doctor has to answer that question simply because just their can do that. It said that about book. Book is familiar in each person. Yes, it is suitable. Because start from on pre-school until university need that Paraconsistent Logic: Consistency, Contradiction and Negation (Logic, Epistemology, and the Unity of

Science) to read.

**Beatrice Rogers:**

Information is provisions for individuals to get better life, information nowadays can get by anyone in everywhere. The information can be a expertise or any news even a problem. What people must be consider any time those information which is within the former life are challenging be find than now is taking seriously which one would work to believe or which one typically the resource are convinced. If you receive the unstable resource then you buy it as your main information we will see huge disadvantage for you. All of those possibilities will not happen within you if you take Paraconsistent Logic: Consistency, Contradiction and Negation (Logic, Epistemology, and the Unity of Science) as your daily resource information.

**Linda Henderson:**

You could spend your free time you just read this book this guide. This Paraconsistent Logic: Consistency, Contradiction and Negation (Logic, Epistemology, and the Unity of Science) is simple to create you can read it in the playground, in the beach, train along with soon. If you did not include much space to bring the particular printed book, you can buy typically the e-book. It is make you better to read it. You can save the particular book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

**Nancy Smith:**

Reading a reserve make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is prepared or printed or outlined from each source that will filled update of news. In this particular modern era like right now, many ways to get information are available for anyone. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just trying to find the Paraconsistent Logic: Consistency, Contradiction and Negation (Logic, Epistemology, and the Unity of Science) when you needed it?
