Editorial Review

From the Back Cover
Explore the most exciting and empowering development platform around–Visual Basic .NET!

Do you want to master programming basics and harness the new tools and techniques that .NET brings to Visual Basic? Within this book and online seminar, you'll get in-depth technology overviews, tips, and step-by-step labs. Integrated question and answer sessions that contain questions from actual Visual Basic .NET students and the classroom-style approach provide a level playing field for people of varying backgrounds and experience.

- Build a learning foundation with a helpful introduction to the world of .NET development
- Discover how .NET incorporates the best features of C++, Visual Basic®, and Java™
- Explore the capabilities offered by a true object oriented development environment
- See the ease of integrating business systems through the use of SOAP and XML Web services
- Examine interoperability, distribution, migration, localization, and deployment with step-by-step procedures for performing each task

Join Bruce Barstow on the companion Web site in a training session. Follow along as he walks you through the online presentation for each chapter provided in streaming video or audio only. Source code is also available for download.

About the Author
BRUCE BARSTOW provides technical training and consulting services in a wide range of technologies spanning programming, network engineering, Internet/Intranet, and messaging solutions worldwide. He has authored more than thirty courses in application development, messaging, and network development and authored the Visual Basic 5.0 and Internet Explorer Administration Kit certification tests for Transcender Corporation, the leader in certification preparation tools.
Tony Martin is a Principal Software Engineer at Best Software, Inc. He creates software development processes and architecture, oversees and manages software development projects, and writes all sorts of code in Visual Basic and C++. He also teaches in-house courses to other programmers who want to learn .NET and what it has to offer.

Users Review

From reader reviews:

Gary Lane:

Do you among people who can't read gratifying if the sentence chained within the straightway, hold on guys this kind of aren't like that. This VB .NET in 60 Minutes a Day book is readable simply by you who hate those straight word style. You will find the facts here are arrange for enjoyable reading experience without leaving also decrease the knowledge that want to provide to you. The writer of VB .NET in 60 Minutes a Day content conveys objective easily to understand by many people. The printed and e-book are not different in the content material but it just different available as it. So , do you even now thinking VB .NET in 60 Minutes a Day is not loveable to be your top listing reading book?
