**Consultations in Dermatology: Studies of Orphan and Unique Patients** By  
Walter B. Shelley, E. Dorinda Shelley

This handbook on dermatologic differential diagnosis and clinical management focuses on sixty-two challenging clinical cases that the authors have encountered in over fifty years of patient practice in dermatology. Each case is presented as a well-written vignette, told in a case-study style. The authors first present the background of each case concisely and including all the clinical details. They then reveal the process involved in the diagnosis and therapy involved. There is also a section on relevant questions that the doctor should be considering.
