## **Veld Management: Principles and Practices** By Frits van Oudtshoorn

Veld is a natural resource vital to our survival on earth. About 80% of our beautiful country consists of veld. Most of this area is used for livestock and game ranching as well as for biodiversity conservation and recreation. Good veld management is needed to prevent land degradation and to ensure sustainable food production and biodiversity conservation. But good veld management relies on a good knowledge of ecological principles and veld management practices, something many land users did not have the privilege to acquire. This book aims to provide the necessary knowledge to assist land users to effectively manage the land under their care, a huge responsibility indeed. Veld Management - Principles and Practices, attempts to simplify a rather technical subject by including more than 380 photographs and illustrations and using easy understandable language.
