

Data Modeling Master Class Training Manual

5th Edition

By Steve Hoberman

Data Modeling Master Class Training Manual 5th Edition By Steve Hoberman

This is the fifth edition of the training manual for the Data Modeling Master Class that Steve Hoberman teaches onsite and through public classes. This text can be purchased prior to attending the Master Class, the latest course schedule and detailed description can be found on Steve Hoberman's website, stevehoberman.com.

The Master Class is a complete data modeling course, containing three days of practical techniques for producing conceptual, logical, and physical relational and dimensional and NoSQL data models. After learning the styles and steps in capturing and modeling requirements, you will apply a **best practices approach** to building and validating data models through the Data Model Scorecard. You will know not just how to build a data model, but how to build a data model *well*. Two case studies and many exercises reinforce the material and will enable you to apply these techniques in your current projects.

Top 10 Objectives:

1. Explain data modeling components and identify them on your projects by following a question-driven approach
2. Demonstrate reading a data model of any size and complexity with the same confidence as reading a book
3. Validate any data model with key "settings" (scope, abstraction, timeframe, function, and format) as well as through the Data Model Scorecard
4. Apply requirements elicitation techniques including interviewing and prototyping
5. Build relational and dimensional conceptual and logical data models, and know the tradeoffs on the physical side for both RDBMS and NoSQL solutions
6. Practice finding structural soundness issues and standards violations
7. Recognize when to use abstraction and where industry data models can give us a great head start
8. Use a series of templates for validating requirements and for data profiling
9. Evaluate definitions for clarity, completeness, and correctness

10. Leverage the Data Vault and enterprise data model for a successful enterprise architecture.

Editorial Review

About the Author

Steve Hoberman balances the formality and precision of data modeling with the realities of building software systems with severe time, budget, and people constraints. In his consulting and teaching, he focuses on templates, tools, and guidelines to reap the benefits of data modeling with minimal investment. He taught his first data modeling class in 1992 and has educated more than 10,000 people about data modeling and business intelligence techniques since then, spanning every continent except Africa and Antarctica. Steve is the author of seven books on data modeling, including the bestseller *Data Modeling Made Simple*. He is the founder of the Design Challenges group, inventor of the Data Model Scorecard®, Conference Chair of the Data Modeling Zone conference, recipient of the 2012 Data Administration Management Association (DAMA) International Professional Achievement Award, and highest rated presenter at Enterprise Data World 2014. Steve can be reached at me@stevehoberman.com, [@DataMdlRockStar](https://twitter.com/DataMdlRockStar) on Twitter, or through Steve Hoberman on Linked-In.

Users Review

From reader reviews:

Alexander Macdougall:

Book is written, printed, or illustrated for everything. You can realize everything you want by a publication. Book has a different type. As it is known to us that book is important factor to bring us around the world. Close to that you can your reading skill was fluently. A book *Data Modeling Master Class Training Manual 5th Edition* will make you to become smarter. You can feel far more confidence if you can know about almost everything. But some of you think in which open or reading a new book make you bored. It is not necessarily make you fun. Why they could be thought like that? Have you seeking best book or suited book with you?

Susan Swain:

Reading a book to get new life style in this year; every people loves to study a book. When you learn a book you can get a lots of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information in it. The information that you will get depend on what types of book that you have read. In order to get information about your study, you can read education books, but if you act like you want to entertain yourself look for a fiction books, such us novel, comics, as well as soon. The *Data Modeling Master Class Training Manual 5th Edition* offer you a new experience in reading through a book.

Randy Hunter:

As we know that book is important thing to add our understanding for everything. By a e-book we can know everything we would like. A book is a list of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This e-book *Data Modeling Master Class Training Manual 5th Edition* was

filled about science. Spend your spare time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading a book. If you know how big good thing about a book, you can feel enjoy to read a publication. In the modern era like now, many ways to get book you wanted.

Johnny Cahill:

E-book is one of source of information. We can add our expertise from it. Not only for students and also native or citizen require book to know the change information of year in order to year. As we know those books have many advantages. Beside all of us add our knowledge, can bring us to around the world. By the book Data Modeling Master Class Training Manual 5th Edition we can have more advantage. Don't one to be creative people? Being creative person must prefer to read a book. Simply choose the best book that appropriate with your aim. Don't end up being doubt to change your life at this book Data Modeling Master Class Training Manual 5th Edition. You can more pleasing than now.
