Gambling Theory and Other Topics By Mason Malmuth

Most people who gamble are attracted by the action and excitement that this form of entertainment offers. But a small number of people are actually quite successful at gambling. How is this so? Why is it that these few can constantly make decisions that devastate their opponents? And what do you need to do to also become successful at this extremely challenging occupation?

Gambling Theory and Other Topics was written in an attempt to answer these questions. In this book, you will be introduced to the dynamic concept of non-self-weighting strategies and shown how these strategies apply not only at the very exciting gaming tables but also in real life. In addition, risk and fluctuations are discussed in terms of the statistical standard deviation, and it is explained how these relate to each other as well as to your bankroll.

Some of the other topics addressed are bankroll requirements, win-rate accuracy, free bets, which blackjack count is best, lottery fallacies, dangerous ideas, poker tournament strategies (including when it is correct to rebuy), settling up in tournaments, pai gow poker, super pan nine, the world's greatest gamblers, building pyramids, and much more.

This text is absolutely must reading for all serious gamblers. Many of the ideas and concepts discussed must be mastered to ensure survival and success in this extremely challenging and highly rewarding profession.

About the Author

Mason Malmuth was born and raised in Coral Gables, Florida. In 1973 he received his BS in Mathematics from Virginia Tech, and completed their Masters program in 1975. While working for the United States Census Bureau in 1979, Mason stopped overnight in Las Vegas while driving to his new assignment in California. He was immediately fascinated by the games, and gambling became his major interest.

After arriving in California he discovered that poker was legal and began playing in some of the public cardrooms as well as taking periodic trips to Las Vegas where he would play both poker and blackjack. In 1982 he went to work for the Northrop Corporation as a mathematician and moved to Los Angeles where he could conveniently pursue his interest in poker in the large public cardrooms in Gardena, Bell Gardens, and Commerce.

In 1983 his first article *Card Domination The Ultimate Blackjack Weapon* was published in *Gambling Times* magazine. In 1987 he left his job with the Northrop Corporation to begin a career as both a full-time gambler and a gambling writer. He has had over 600 articles published in various magazines and is the author or co-author of 14 books. These include *Gambling Theory and Other Topics*, where he tries to demonstrate why only a small number of people are highly successful at gambling. In this book he introduces the reader to the concept of non-self weighting strategies and explains why successful gambling is actually a balance of luck and skill. Other books he has co-authored include *Hold em Poker For Advanced Players*, written with David Sklansky, *Seven-Card Stud For Advanced Players* written with David Sklansky and Ray Zee, and *Small Stakes Hold em: Winning Big with Expert Play* written with Ed Miller and David Sklansky. All the advanced books are considered the definitive works on these games.

His company Two Plus Two Publishing has sold over two million books and currently has 37 titles to its credit. These books are recognized as the best in their field and are thoroughly studied by those individuals who take gambling seriously.
